PROFILE

Motivated B.Tech  CSE (AI/ML) student seeking opportunities to apply programming and problem-solving skills in software development and build impactful real-world applications.
I am skilled in building full-stack applications and have a strong foundation in algorithms, with the ability to work effectively in a team.

EDUCATION

IMS Enginnering College Sep 2023 – Sep 2027
B Tech (CSE AI&ML)-7.0 

Holy Cross School Mar 2021 – Jun 2022
Secondary School-74%

Holy Cross School Jul 2019 – May 2020
High School -79%

PROJECT

Developer Portfolio Generator Apr 2026 – May 2026
Tech Stack: Spring boot, Spring security, PostgreSQL, JPA, REACT-VITE
Built a dynamic portfolio generator using Spring Boot and MongoDB with REST APIs for real-time content updates.

URL Shortner Web Application(Full Stack Project) Feb 2026 – Mar 2026
Tech Stack: Spring Framework, JWT Authenciation, React, Tailwind CSS, MySQL
Developed a URL shortening service with fast redirection using Spring Boot and database integration.

Real -time Data Analytics Dashboard Jan 2026 – Mar 2026
TechStack: React.js, Spring Boot, WebSockets, Python (Pandas), PostgreSQL, Power BI
Designed a real-time dashboard for streaming data analysis with live visualization and scalable backend architecture.

ACHIEVEMENTS

Code Competitions
1st prize in Tech-Fest code-decode competitions

Hackthon Finalist

Leetcode Problem Solving

TECHNICAL SKILLS

Programming Languages: Java, Python, javascript

Data&Analysis: PowerBI, SQL, Excel, PostgreSQL

Backend: Spring Framework, Spring Security, JWT Authentication

TOOLS: Git, GitHub, Postman, DockerHub

Frontend: Html, CSS, React, Tailwind, Javascript
